

ROOF DEFENSE SYSTEM™

WHY DO YOU NEED ROOF PROTECTION?

- Roof air-conditioning copper theft is a growing problem which increased 80% in the last year
- Total damages far exceed the actual cost of replacing stolen copper - *by over 300%*
- The National Crime Bureau (NICB) report says each year, approximately \$1 Billion worth of copper alone is stolen in the U.S.
- According to the FBI, "Copper thieves are threatening US critical infrastructure"
- To prevent break-ins through skylights and theft of valuable rooftop assets

HOW DOES THE RDS WORK?

- The Roof Defense System makes stepping onto the surface of a roof the triggering mechanism for your alarm system - only the weight pressure from a human (35+ pounds) activates the alarm
- The RDS is more effective than older microwave, magnetron, motion sensor and infrared systems which are plagued by numerous false alarms
- The RDS is easily installed on new and/or existing roofs
- Easily integrated into existing security systems

- Using the HS Controller, the the RDS system can be programmed to activate security lights, horns, sirens and/or existing alarm functions
- Cell modem or WiFi enabled to communicate with smart-phone apps, existing alarm systems, on-site security personnel, dispatch center or the property owner
- No permitting, variances or easement required
- Code compliant security system
- Stealthy and operates 24/7

ABOUT US

Heightened-Security Inc. manufactures security solutions for a wide range of commercial and residential clients. Our products are designed for transportation facilities, high-end gated residential communities, private estates, institutional facilities, municipal facilities, educational campuses, sensitive industrial facilities and other properties requiring intrusion protection systems.

Located in Southern California, our founders and leadership team possess over 50 years of experience in security and engineering solutions. We put this experience to work in every one of our products, combining technological developments with simple, innovative ideas. The result is products that are affordable, easy to install, easy to maintain and most importantly, products that work.

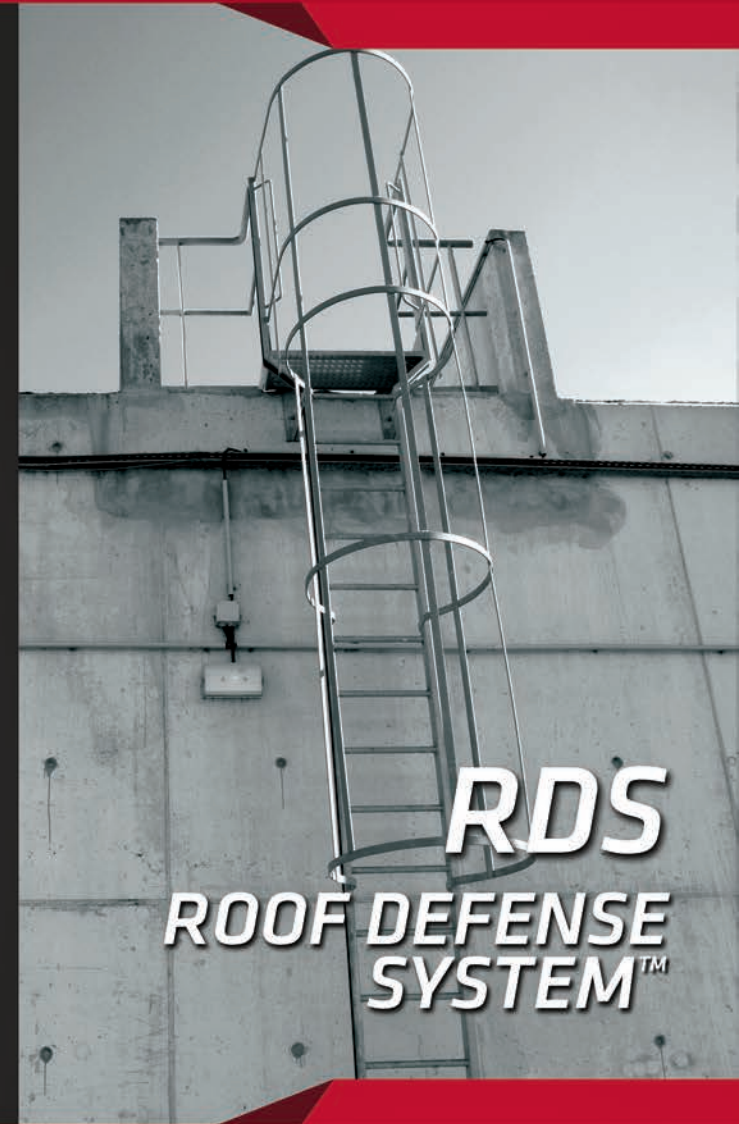

Heightened-Security can install all of its own products or we can partner with pre-approved security integrators. Our security products are 100% American made and protected with multiple U. S. Patents Pending.

To learn more about the Heightened-Security intrusion solutions, please visit our website www.hs-usa.com or call us at 760.813.3003.
