

TRAFFIC SHIELD™

A BETTER GAWK AND GLARE SHIELD

TRAFFIC SHIELD™ from HEIGHTENED-SECURITY is a better and safer Gawk & Glare shield, replacing traditional wooden or plastic materials that employ metal posts/screws and/or bolts. The TRAFFIC SHIELD is a fully armored product that uses recycled EPS foam and is easily installed and removed by a single worker. Our improved TRAFFIC SHIELD is 75% lighter than current products on the market.

TRAFFIC SHIELD™ is constructed using 100% recycled EPS foam and armored/protected with a Polyurea Protective Coating that is 100% free of Volatile Organic Compounds (VOC). The UV coating is weatherproof and extremely durable - allowing for outside storage when not in use.

TRAFFIC SHIELD™ blocks on-coming headlights and protects motorists from water spray from opposing traffic. TRAFFIC SHIELD protects workers from dust, dirt and flying debris while on-site - improving worker safety.

Protect workers and work sites

Eliminate dangerous work site conditions with **TRAFFIC SHIELD**

Our temporary TRAFFIC SHIELD replaces dangerous plywood and metal pipe products, creating a safe, protected workspace.

Current screen constructed of plywood/metal posts

- Simple Installation
- No tools required
- Enhanced workplace safety

With temporary TRAFFIC SHIELD installed

- Available as a temporary and/or permanent Gawk & Glare Screen
- Available in various standard safety shapes
- Available in 24", 30" or 36" sizes (custom sizes also available)
- 100% recycled materials
- Custom fabricated to meet project requirements
- State-of-the-art compressed/cut recycled EPS foam
- UV protected
- Color coated to your specification
- Resists salts, chlorides and corrosion
- High compression and impact strength
- No dangerous projectiles upon impact

The TRAFFIC SHIELD eliminates dangerous, ugly and expensive, Gawk & Glare screens and protects workers from dust, dirt and impact projectiles - replace that dangerous plywood!

For more information about the TRAFFIC SHIELD visit our website or call us at 760-813-3003.

Our permanent Traffic Shield connects directly to existing traffic barriers - blocking headlight glare and eliminating dangerous projectiles upon impact

TRAFFIC SHIELD™

A BETTER GAWK AND GLARE SHIELD

APPLICATIONS

- Temporary Steel and Concrete Barriers - Permanent Barriers and Guardrails
 - Curved Roadways - Access Ramps - Wooden Guardrails
 - Protection for Work Zone Crews - Toll Booth Plazas
 - Permanent Solutions for Problem Areas

CONSTRUCTION MATERIALS

- EPS Foam

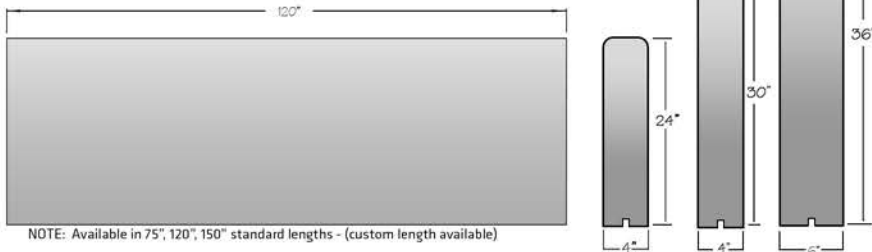

Recycled EPS foam is used to construct the TRAFFIC SHIELD to specific shapes required for road/construction projects. By conserving, and reusing, resources we are doing our part to ensure a brighter future for our environment.

EPS Foam Facts:

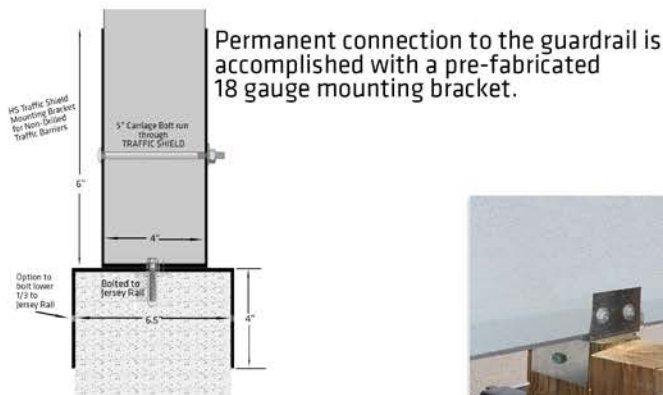

- EPS foam is recyclable
- EPS foam does not contain chlorofluorocarbon (CFC) hydrochlorofluorocarbon (HCFC) or formaldehyde
- EPS foam does not contribute to the growth of mold or mildew
- In case of fire, EPS foam is no more toxic than Douglas Fir
- EPS foam is manufactured in accordance with ASTM C578

- Protective Finish

- Armored with polyurea protective coating (no VOC)
- Polyurea Coating is color-matched to specifications

The HS TRAFFIC SHIELD™ is available in 24", 30" and/or 36" height and varying widths, and lengths, per state requirements.

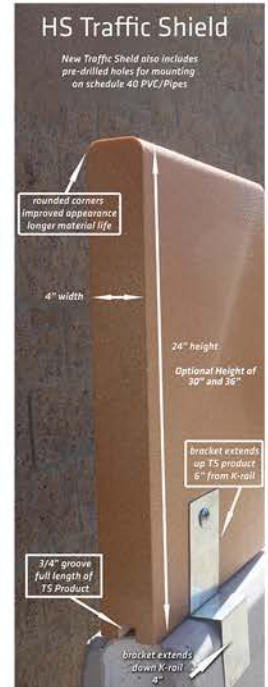

NOTE: The Traffic Shield is available with brackets that mount to both older version 6" wood and/or the new 4" rubberized blocks.

- Easily stacked for shipment and/or storage.
- Store outside in any climate
- UV protected
- Armored
- Color matched for any project

TRAFFIC SHIELD™

FEATURES and BENEFITS

- Eliminates motorist distractions from on-coming headlight glare
- Available in 24", 30" and 36" heights
- Protects work zone crews from injuries
- Protects work zone crews from excessive noise
- UV Protected Polyurea Armored EPS recycled foam
- Low maintenance costs
- Low installation costs
- Ease of installation and/or repair
 - PVC installation on pre-drilled CalTrans barrier
 - Bracket installation on Jersey-Rail/barrier
- Custom fabricated for each project
- Easy, secure installation
- Self-Supporting option for concrete barrier, steel and wooden guard rail systems
